

Rotary dryer

Brief Introduction of Rotary dryer

Rotary dryer, also known as rotary drum dryer. Rotary dryer is widely used in building materials, metallurgy, chemicals, industrial drying slag cement limestone, coal, slag, clay and other materials. The aircraft mainly by the Rotary, Jan plate, transmission, seals, and other support equipment and components. With a reasonable structure, well-produced, high yield, and low consumption, the advantages of operating convenience. Rotary dryer's quality assurance, the highest free installation debugging agent can be checked with other like about rotary dryer than quality or prices.

Rotary dryer Technical Specification

type(mm)	indinclination(%)	rotation speed(r/min)	input temperature(°C)	motor power(kw)	outpur(t/h)	weight(t)	reforance
Φ600×6000	3-5	3-8	≤700	3	0.5-1.5	2.9	
Φ800×8000	3-5	3-8	≤700	4	0.8-2.0	3.5	
Φ800×10000	3-5	3-8	≤700	4	0.8-2.5	4.5	
Φ1000×10000	3-5	3-8	≤700	5.5	1.0-3.5	5.6	
Φ1200×10000	3-5	3-8	≤700	7.5	1.8-5	14.5	
Φ1200×12000	3-5	3-8	≤700	11	2-6	14.8	
Φ1500×12000	3-5	2-6	≤800	15	3.5-9	17.8	
Φ1800×12000	3-5	2-6	≤800	18	5-12	25	
Φ2200×12000	3-5	1.5-6	≤800	18.5	6-15	33	
Φ2200×18000	3-5	1.5-6	≤800	22	10-18	53.8	
Φ2200×20000	3-5	1.5-6	≤800	30	12-20	56
